**I Want To Live Again**
**Recorded by Merle Haggard and Bonnie Owens**
**Written by Fuzzy Owen**

```
C                        G                   D7            G
We stopped living when our love died and I wanta live again

                                                            D7
Our love grew cold a long time ago we both know love is gone
                                                G
Yet we stay together we just keep hanging on
                                                                C
But it's wrong to live together when our love has reached an end
                         G                   D7            G
We stopped living when our love died and I wanta live again

I wanna be kissed like I used to be
D7
Thrilled like I used to be

Loved like I used to be
              G
I wanta live again

                                                              D7
Each time we kiss we search for love that used to fill our hearts
                                                            G
But it's all wrong the thrill is gone we're just too far apart
                                                   C
We live a life of loneliness each day that we pretend
                         G                   D7            G
We stopped living when our love died and I wanta live again
```

**Repeat #2**
