

What About Love
Chris Hillman and Steve Hill

Always one to honor and obey
Tried to do the best in my own way
How could I know

Raised so straight and true
Never knowing all that they can do
How could I know

She wasn't who she appeared to be
Took my life and ran from me
How could I know
Ooh, how could I know

Yeah, I know that Heaven don't lie and the devil don't pray
And the world still turns if you stand in one place
You'll never find what you never see
You better answer me please

What about love love love love
If it makes the world go round
My world stopped just long enough
To watch our love go down

An honest man can be deceived
By a lover too blind to see
How could he know

The water is deep and runs so wide
Can it carry you to the other side
How could I know
Ooh, how could I know

Yeah, I know that Heaven don't lie and the devil don't pray
And the world still turns if you stand in one place
You never find what you never see
You better answer me please

What about love love love love
If it makes the world go round
What about love love love love
If it makes the world go round
My world stopped just long enough
To watch our love go down
