

You And I
(Gene Clark)

I will see you now and then
And I know it's really right
To continue to be friends with our feelings out of sight
Though the pictures very clear
It's not nearly black or white
'Cause it really has to do with you and I

Every time we meet we are drawn closer to each other
With someone else's name you must do right
It's a twist of fate
There is a new love to discover
I know, you know, I long to hold you tight

We could talk about the past
Knowing it will never change
Or just make this moment last
Till the clouds run out of rain
I can feel you with me now
And now is all the time
'Cause it really has to do with you and I
