Room Across The Hall—The Willis Brothers  
Author: Jack Rhodes and Porter Jordan

C                  F
Each night I stare in darkness at shadows on the wall
G7                      C
And listen to your laughter in the room across the hall
F
I tremble when there's silence and your name I call
G7                  C
For you're with another in the room across the hall

G7                      C
The music that is playing are songs you played for me
D7                                    G7
The love words that you're saying are words I once believed
C                  F
In loneliness I wait here for your footsteps to fall
G7                      C
For that's when you'll be leaving the room across the hall

G7                      C
The music that is playing are songs you played for me
D7                                    G7
The love words that you're saying are words I once believed
C                  F
In loneliness I wait here for your footsteps to fall
G7                      C
For that's when you'll be leaving the room across the hall

Repeat #2,3
