**Please remember that I love you**

Please remember that I love you  
And I hope you'll not forget  
Each hour, each day, our love grows stronger  
Since the day that we first met

Nothing now can separate us  
Nothing but the end of time  
Please remember that I love you  
Don't forget that you're all mine

When I'm holding you so close dear  
Lips so sweet brush close to mine  
Time stands still, my world is brighter  
By a love that's so sublime

Please remember that I love you  
That no one can take away  
All the vows we made together  
Are locked in my heart to stay
