Y2K Ditty

Y2k Ditty

(Linda Hirschhorn c 1998)

The year 2000 is approaching fast --
Some people think the world is headed fo-r a crash;
Come, my friends, let's raise our voices
What else is there to d-o when the on-ly choice is

CHO: singing

Calypso -- apocalyptic song,
Calypso a cappella, apocalyptic song.

This century full of terror and fright
Let's just start it over and this time we do it right
Shut off the computers and the videos and TV
Bring peace upon the planet by singing harmony,

Millenium fever take us by surprise
Together we will tumble or together we rise
Y2K is an opportunity
To go back to mother nature and comunity.
